## 1948 - LIST

**H. PATTERSON & SONS**

**BERGENFIELD, N. J.**

*Telephone Dumont 4-0460-61*

"SPECIAL NOTICE"

A mistake was made in the printing of our new 1948 Price List in that the price of 1-3/4 inch pots shou'd read \$2.00 per pot instead of \$3.00.

We invite correspondence from those customers who have already purchased plants in this size at the higher price in order to adjust the difference.

H. Patterson & Sons  
ORCHIDHAVEN

Bergenfield, N. J.

# “ORCHIDHAVEN”

## 1948 - LIST

This is our first listing for 1948 covering Seedlings from Community pot size up to and including blooming size plants. Throughout the year when it becomes necessary we will send out additions to this list. We have tried in our brief descriptions to proffer as much information as possible about what may be expected from these seedlings when maturity is reached. When we have started to bloom any particular batch we do our best to describe truthfully as to just how the first seedlings of that batch have bloomed.

Former results have been our chief guiding influence in the making of these Hybrids. Extreme care has been taken as to the selection of parents so as to insure - FINE GROWTH - PRODUCTIVITY - TEXTURE - COLOR - SIZE - and another very important factor - SEASON OF BLOOM.

In every way possible we have tried to make this list complete. However, there are some other crosses beyond this list in very limited quantities which may fill a certain need. Please acquaint us with your wants beyond our list.

We are equipped to ship anywhere in the United States and its possessions, Canada, Central and South America, Cuba and the Philippine Islands. We are equipped to comply with the special new Hawaiian regulations regarding imports of Orchid plants. We enclose copies of the special import permit application needed for Hawaiian shipments.

We prefer to ship plants out of pots, placing plants with compost intact in paper pots. This will greatly lower cost of shipping, especially when the distance is great. Packing is free of charge for all plants on this list. Prices are F.O.B. Bergenfield in U. S. Dollars.

Overseas shipments should be accompanied by estimated shipping costs so shipment may be prepaid to avoid delays. Please clearly indicate method of shipping when placing order.

Second choice should be included in selecting varieties to replace any which may be sold out.

It should be remembered that practically all of the plants we offer are ready for a shift during their present growing season. This is brought about by the fact that we do not over-pot.

We welcome visitors — we are only ten miles from Times Square, New York.

1948 - LAST

This is our first listing for 1948 covering Seedlings from Community pot size up to and including blooming size plants throughout the year when it becomes necessary we will send out additions to this list. We have tried in our brief descriptions to better as much information as possible about what may be expected from these seedlings when they truly are received. When we have started to plant any particular batch we do our best to describe truthfully as to just how the first seedlings of that batch have bloomed.

Former results have been our chief guiding influence in the making of these hybrids. Extreme care has been taken as to the selection of parents so as to insure - FINE GROWTH - PRODUCTIVITY - TEXTURE - COLOR - SIZE - and another very important factor - SEASON OF BLOOM. In every way possible we have tried to make this list complete. However, there are some other crosses beyond this list in very limited quantities which may fill a certain need. Please comment us with your wants beyond our list.

We are equipped to ship anywhere in the United States and its possessions, Canada, Central and South America, Cuba and the Philippine Islands. We are equipped to comply with the special laws of Hawaii regarding importation of Orchid plants. We enclose copies of the special import permit application needed for Hawaiian shipments.

We prefer to ship plants out of our growing plants with constant intact in paper pots. This will greatly lower cost of shipping, especially when the distance is great. Packing is free of charge for all plants on this list. Prices are P.O.D. Brought in U.S. Dollars.

Overseas shipments should be accompanied by estimated shipping costs so shipment may be prepaid to avoid delays. Please clearly indicate method of shipping when placing order.

Second choice should be included in selecting varieties to replace any which may be sold out.

It should be remembered that practically all of the plants we offer are ready for a shift during their present growing season. This is due only about by the fact that we do not over-pot.

We welcome visitors - we are only ten miles from Times Square, New York.

## COMMUNITY POTS

Our Community Plants are planted in three inch pots containing twenty or more plants. Price per pot is \$15.00. Any pots shipped will be of a size large enough for transplanting. The material we use in growing Community Plants is very friable, making the job of transplanting an easy one over other types of compost. We are very happy in the fact that we have a great many well satisfied customers for this reason alone. Here again we must stress the fact that we only use the finest parents procurable. Also, only the healthiest seedlings are shipped.

One and three-fourth inch pots will be available at the times specified in the following list and will be priced at \$3.00 per pot. They will have been established four months and up, in the pots that they would be growing in at the time of shipment.

### COMMUNITY POTS READY FOR IMMEDIATE SHIPMENT

#### 1 3/4 INCH POTS READY FOR SHIPMENT JULY

**505 C. TRIMOS (C. MOSSIAE #24 X C. TRIANAE GOLD LIP)**

An old dependable cross for February and March is repeated here with very fine parents. The flowers should be of medium color and the plants from any former cross of the same parents have always grown very well. When the proper parents are selected such as the case is here, flowers of good texture can well be expected.

**521 LC. CASSANDRA X LC. OLIVER LINES**

An exceptional Hybrid for late Fall and early Winter is the particular quest here. Both Lc. Cassandra and Lc. Oliver Lines are two very substantial growers. Both Hybrids bear flowers of outstanding quality, are dark and have large lips.

**522 SAME AS #521.**

**523 BC. CLIFTONII "MAGNIFICA" X LC. DUPRESAN**

A quality Hybrid for the Spring months of March, April and May could well be expected from this union. Both parents are of very firm texture. The Brassocattleya influence of Cliftonii Magnifica will insure a fine large lip. The great range of color in former Hybrids produced by Lc. Sagana should carry out in this particular cross. Both parents are always of good form and flowers should be very large.

**525 LC. EUGENIE X (C. TRIANAE "REINECKIANA" X C. DIONYSIUS ALBA)**

A strong growing White with a colored lip for November, December and January could very well be expected here. Both parents are exceptionally strong growers. A number of fine parent type plants have been bloomed out of both of these batches of Hybrids. Flowers of either Hybrid are always of good form.

**529 C. BARBARA DANE X C. CLEMENTINE GOLDFARB**

September is a month which is generally shy as far as Whites are concerned. Commercial growers are always at wits-end to cope with the demand during this season. The two parents used here always bloom during this period. Two very excellent types were used in this cross. Both are very excellent growers.

**542 C. MOSSIAE "REINECKIANA" (YOUNG'S VAR.) X C. GIGAS "F.M.B."**

Our full confidence in this grand Hybrid has prompted our remaking this cross again and again. Please refer to description under # 565

**543 C. MOSSIAE "REINECKIANA" (YOUNG'S VAR.) X C. PRINCESS ROYAL ALBA**

We expect a fine Spring blooming White colored lip from the union of these two great parents. C. Mossiae "Reineckiana" (Young's Variety) has a great many new Hybrids to its credit.

**544 C. MOSSIAE "REINECKIANA" (YOUNGS VAR.) X C. GIGAS "F.M.B."**

Any of the times we remake this Hybrid it is always with the same parents. You can purchase with this assurance.

Please refer to description under #565

**545 C. MOSSIAE "REINECKIANA" (YOUNG'S VAR.) X C. DIONYSIUS ALBA #97**

Here again we try for a Spring White with colored lip. We use a particular Dionysius Alba which has made some wonderful Hybrids for us. The famous C. Mossiae "Reineckiana" (Young's Variety) is the other half of this cross. Season should be May and June.

**547 C. MARION DAVIES X C. TRIANAE "BROOMHILLS VAR."**

The union of these two wonderful parents will surely produce a White Hybrid for the late Winter and early Spring season. This Hybrid could be fashioned to bloom for most of the Easter dates. Both parents are very good growers.

**548 C. INTERTEXTA "JULIETTE" X C. TRIANAE "BROOMHILLS VAR."**

We are most certain that this union will make a most satisfactory Winter White. The growth is bound to be exceptional. Flower production should be very good as both parents are good producers. C. Trianae Broomhills Variety has turned out our excellent new Hybrid C. Barbara Billingsley.

**551 C. ENID ALBA XXXX BEST X C. MRS. FREDERICK KNOLLYS**

The fine growing character of both these crosses will surely make a fine Winter White colored lip cross. Both parents were extremely large flowers with very fine lips. Both parents always bloom during January, February and March.

**554 C. ROYANA X LC. PRINCESS MARGARET**

C. Royana is an exceptionally strong growing Cattleya of large size. Its color is very dark with exceptionally dark lips with a wonderful suffusion of yellow. A union with Princess Margaret should make a great Hybrid for the months of May, June and July.

**557 (C. DINAH X LC. EXCELSIOR) X C. MOSSIAE "R. E. PATTERSON"**

Here again we make a bid for an Easter blooming Hybrid. C. Mossiae "R. E. Patterson" is the darkest Mossiae we know of and it is of the early type, well shaped and of very good substance. The Hybrid used on this Mossiae has a splendid shape and always has an extra dark lip. We have every reason to believe that this will be a very outstanding Hybrid for Spring blooming purposes.

**558 C. CADWALADER X C. ROYANA**

There has been in the years past a particular deficiency of quality Hybrids during May and June. In making this particular cross we are sure we will bridge this specific period. Both parents are very strong growers.

**559 C. ROYANA X C. CARMEN**

Here again we make a bid for a May and June Hybrid of good quality to cover a sparse period in Hybrids. Both parents were of a very dark color and had exceptionally well colored dark lips. A strong growing plant should be the result.

**561 LC. CASSANDRA "F.C.C." X C. TRIANAE "THE PREMIER"**

A bid for a fine Hybrid for the Christmas Holiday Season is our particular quest here. Both parents are exceptional flowers. There have been times that we have bloomed Lc. Cassandra with blooms measuring nine to ten inches across the flower. C. Trianae "The Premier" has a long list of fine Hybrids to its credit. Both parents have great texture in the flowers.

**563 LC. INTEGRITY X C. TRIANAE "ORANGE LIP VARIETY"**

The months of December and January are scarce months for Cattleyas. We hope to bridge this particular period with this Hybrid. The Hybrid used always blooms during the months of December and January. The Trianae is an exceptionally dark type of great substance.

**564 LC. SAGANA "VAR. EASTER" X C. MOSSIAE**

This is a repeat cross for us. We have made it again because all of the earlier batches have proved most successful in making a large dark free growing hybrid, for the Easter season.

**565 C. MOSSIAE "REINECKIANA" (YOUNG'S VAR.) X C. GIGAS "F.M.B."**

Earlier buyers of this old cross remade with identical parents have been most anxious to enlarge their stock of this great Hybrid. Strangely enough all of our earlier batch bloom in January, February and March. The flowers are large and are well shaped. They are paper white in the sepals and petals. The lips are large and very interesting.

**566 LC. WINDERMERE X C. MOSSIAE "R. E. PATTERSON"**

This is a repeat cross of which we have bloomed three other crosses with the identical parents. We are very certain the results again will be as before. The flowers fill a great need for exceptional Hybrids for the Spring season; a season which, at the present time, is devoid of quality Hybrids in quantity.

**567 LC. SAGANA "EASTER VARIETY" X C. MOSSIAE "R. E. PATTERSON"**

Please refer to description under #564.

**568 LC. BOU PHILIPPO (LC. WINDERMERE "A.M." VARIETY X C. MOSSIAE "OLIVER LINES")**

For several years we have been blooming this particular cross under our #285 and we have had some very excellent types. One of the main reasons for the great value in this cross is its particular season, we have always cut a great number of flowers for Easter. It can be handled a good deal like Mossiae and its grand performance as far as season, quantity of flowers and fine growing qualities are concerned, has prompted us to remake this cross again and again. To date it has been one of our finest type Mossiae Hybrids. We repeat this cross with the identical parents which have made #285.

**569 BLC. EVA PATTERSON X C. BELGICA "A.M." VARIETY**

Our quest here is for fine Hybrids for December and January covering the Holiday season of the year. Both parents are very strong growers. Flowers should also be very large. The C. Belgica which was used received an award since at the A.O.S. meeting in December 1947.

**570 LC. WINDERMERE "A.M." X C. ENID XXXX**

We have remade this cross with identical parents as our earlier batch has been so very satisfactory. The flowers of the previous batch were large, dark and well shaped, and texture was very good. The plant is a very strong grower.

**571 LC. DERRYNANE "VAR. HENRIETTA PATTERSON" X C. ROYANA (EXTRA FINE)**

Two exceptional Hybrids were used here. Lc. Derrynane is a very good Hybrid derived from Lc. Princess Margaret. C. Royana was described elsewhere in this list.

**572 LC. HELEN WILMER "A.M." VAR. X LC. ALTESSE**

Both Lc. Helen Wilmer and the Lc. Altesse which were used were exceptionally dark flowers. Whenever Helen Wilmer has been used it has always lent quality to the resulting Hybrid. Lc. Altesse is a very strong grower which always bears fine textured large flowers. This should make a similar Hybrid to our newest Hybrid Lc. Governor Gore.

**573 C. MOSSIAE "REINECKIANA" (YOUNG'S VAR.) X C. GIGAS "F.M.B."**

Please refer to description under #565

**574 (#38 C. RAPHAELII X C. MT. ROYAL) X C. MOSSIAE "R. E. PATTERSON"**

The Hybrid used on C. Mossiae "R. E. Patterson" was an extremely dark and well shaped flower of great substance. The lip of this particular Hybrid was very dark with large yellow eyes. The flower over all was very large. We again use our old standby, Mossiae "R. E. Patterson."

**575 LC. ERNIE PYLE (LC. ALTESSE X C. MOSSIAE "R. E. PATTERSON")**

This cross was remade with our fine dark Mossiae "R. E. Patterson." When we first made this particular cross we were very happy over the fact that the first plant bloomed in three years and four months from seed. This plant now is six years old and has bloomed on seven bulbs; the reason being, on single lead parts of the plant two growths have been put up each blooming year. The flowers which we have just cut on this plant numbered twelve blooms. The plant is now a strong double lead plant.

**576 LC. HELEN WILMER X C. MOSSIAE "R. E. PATTERSON"**

Please refer to description under #492.

**577 LC. PRINCESS MARGARET #2 X C. ENID (VAR. ORCHIDHAVEN)**

We remake this particular cross once again with the best parents obtainable. Fine results are assured. Please refer to general description under #425.

**COMMUNITY POTS READY FOR SHIPMENT IN JULY**

**549 C. TRIANAE "A. C. BURRAGE" X LC. WINDERMERE "A. M."**

During December and January a few years hence we have every reason to believe that we will experience that thrill of seeing for the first time a grand new Hybrid. Lc. Windermere A. M. has assured this in so many of its crosses. Trianae A. C. Burrage has an exceptionally fine form and along with Lc. Windermere A. M. should make a wonderful addition to the Orchid world.

**552 C. EDITHIAE #1 (XXXXX) X C. INTERTEXTA "JULIETTE" #158**

We expect an excellent grower for the months of February and March from this cross. The particular Edithiae used here never blooms until the first week in March or later. The Intertexta used is a fine type from a large seedling batch raised at Orchidhaven.

**553 C. CLEMENTINE GOLDFARB X C. PEGEEN FITZGERALD**

An exceptionally strong growing and very large White for November and December should be the result of this union of two grand White Hybrids. It is not at all uncommon to have Clementine Goldfarb make two growths per year on a single lead plant. Flowers are always very large and it is not unusual to see flowers to the number of four on a stem. C. Pegeen Fitzgerald can always be remembered for its paper whiteness and very fine form.

**555 LC. PRINCESS MARGARET X C. TAPPAN**

We are using Princess Margaret in a number of different ways with very strong growing Hybrids only. This particular cross should yield an exceptionally strong growing Hybrid for late Fall of that dependable Princess Margaret type.

**560 C. ROYANA X C. CARMEN**

Please refer to #559 for description.

**578 C. ENID (ORCHIDHAVEN) X C. PRINCESS MARGARET**

We repeat this grand cross with the best parents obtainable. For further description please refer to #425.

Cross No.	Name, Parentage and Description	Size	Each
399	<b>C. CLEMENTINE GOLDFARB X C. BEN NEVIS</b> One of the very useful things in White Cattleyas is to have fine flowers in the months of September, October and November. This season is a busy one for the commercial man and is a most enjoyable time to have flowers for the amateur flower shows. A great number of plants of this Hybrid have already bloomed and have proved most satisfactory. Flowers are well shaped and of good texture. This Hybrid is an excellent grower.	3" pots 3½" pots 4" pots	\$10.00 \$15.00 \$16.00
400	<b>C. S. E. ENDICOTT X C. CLEMENTINE GOLDFARB</b> The season for this Hybrid is about the same time as #399. It is also a very fine grower. Many plants are putting up as many as two growths per year on a single lead plant. It is not unusual for a stem to bear as many as four flowers.	3" pots 3½" pots 4" pots	\$10.00 \$15.00 \$16.00
401	<b>C. ENID (C. MOSSIAE "R. E. PATTERSON" X C. GIGAS)</b> This is a repeat cross of a very dependable Cattleya. Two very fine parents were used. C. Enid has always been known for its fine growing characteristics. Flower production has always been above average in this particular cross.	3" pots 3½" pots 4" pots	\$8.00 \$12.00 15.00
404	<b>C. ADMIRATION X LC. ALTESSE (VAR. ORCHIDHAVEN)</b> An abundance of C. Remy Chollet in this cross will go a long way in making it a fine Hybrid. Both parents are of the best type procurable. Several of the 3½" plants have bloomed. The flowers were very dark and very well shaped. The plants continue to grow like either one of the parents.	3½" pots 4" pots	\$12.00 15.00
419	<b>C. CLEMENTINE GOLDFARB (OSMERS VAR) X C. EUCHARIS (VAR. ORCHIDVALE)</b> C. Clementine Goldfarb (Osmers Variety) is a proven pure white which is an extremely vigorous grower. In flower production it is unexcelled. It always makes two growths on single lead plants. The C. Eucharis which was used was the best procurable. A few of the 4" pots have bloomed and the flowers were very fine. Season will be January, February and March.	3" pots 3½" pots 4" pots	\$10.00 \$15.00 \$16.00
420	<b>C. EUCHARIS (VAR. ORCHIDVALE) X C. CLEMENTINE GOLDFARB (OSMERS VAR.)</b> We refer you to description under #419.	3" pots 3½" pots 4" pots	\$10.00 15.00 16.00
425	<b>LC. GEORGE BALDWIN (LC. PRINCESS MARGARET X C. ENID)</b> Uniting these two already great Orchids results in the Hybrid named Lc. George Baldwin. Little need be said in its behalf. In the short time of its existence it has already won a great many awards. Our firm has raised and flowered several batches of this great Hybrid and through the knowledge gained thereby feel qualified in repeating this exceptional cross from time to time. Season is September to December. Flowers are always large and well shaped. Substance is excellent. Color is mostly dark.	2½" pots 3" pots 3½" pots 4" pots 4½" pots 5" pots	5.00 8.00 \$12.00 15.00 16.00 \$20.00
426	<b>C. CLEMENTINE GOLDFARB X C. RITA SLADDEN</b> This cross should result in a very strong growing pure white for Fall and early Winter. Flowers will be large and of good substance.	2½" pots 3" pots 3½" pots 4" pots	\$6.00 10.00 15.00 \$16.00

Cross No.	Name, Parentage and Description	Size	Each
428	<b>LC. ALTESSE (VAR ORCHIDHAVEN X C. ENID (VAR ORCHIDHAVEN))</b> We have repeated this cross because of the very fine results of an earlier cross with the same parents which we have named "Lc. Alten." The result has been an extra large flower much darker than most Enids. The lip is very dark and exceptionally large. The season is January, February and March. Both parents are exceptionally strong growers and so far this particular batch is also very strong in growth.	3" pots 3 1/2" pots	\$8.00 12.00
429	<b>LC. WALTER WINCHELL (C. TAPPAN X LC. DUPRESAN)</b> This Hybrid was pictured in one of our recent advertisements. It is a very large, well shaped, dark flower of great texture. Growth is exceptional.	3 1/2" pots 4" pots	12.00 15.00
430	<b>LC. GOVERNOR GORE (LC. ALTESSE "VAR. ORCHIDHAVEN" X LC. HERTHA "VAR. ORCHIDHAVEN")</b> We believe that Lc. Altesse (Variety Orchidhaven) is one of the finest Winter Hybrids. We have used it many times without a disappointment. Our Lc. Hertha is one of the finest shaped Laeliocattleyas that we have ever seen. It has always imparted fine qualities in any cross we have ever used it in. Recently we have bloomed several flowers of this cross. Results were most outstanding. Any of the flowers were show flowers. We are happy about this as we have sold large quantities through the past three years. At present we must limit this cross severely.	3" pots 3 1/2" pots 4" pots	8.00 12.00 15.00
431	<b>C. TRED A X LC. ALTESSE</b> The presence of C. Leda in C. Treda will go far in imparting high color to this Hybrid. All of the components bloom in the Winter. The resulting Hybrid should be a fine grower as all of the parents are excellent growers.	2 1/2" pots	5.00
432	<b>LC. JANE DANE X LC. CANHAMIANA ALBA</b> One of the hardest seasons to breach with a good White with a colored lip is in the late Winter and early Spring months. After a great many attempts to make the above cross we have finally succeeded in making, what we in our opinion believe, will be a most outstanding cross in this class. Season should be February to April.	2" pots 2 1/2" pots 3" pots 3 1/2" pots	\$3.00 \$6.00 10.00 15.00
433	<b>C. ENID X LC. DUPRESAN</b> Two very strong growers have been used here to make this cross. Resulting Hybrid should be of medium dark color. Size should be very good, as both parents are inclined to be large.	2 1/2" pots	5.00
436	<b>LC. DUPRESAN X C. MAGOWA</b> An extremely strong growing Hybrid of fine coloring especially in the labellum should be the result of this crossing. Earlier use of both parents in other crosses have resulted in some very excellent Hybrids. Season of bloom should be November and December. Commercial growers could use this Hybrid for their Thanksgiving and Christmas markets.	2 1/2" pots	\$5.00
438	<b>LC. GOVERNOR GORE (LC. ALTESSE "VAR. ORCHIDHAVEN" X LC. HERTHA "VAR. ORCHIDHAVEN")</b> We refer you to description under No. 430.	3 1/2" pots	12.00

Cross No.	Name, Parentage and Description	Size	Each
440	<b>LC. HELEN WILMER (VAR. ORCHIDHAVEN) X C. LEDA (VERY DARK VARIETY)</b> C. Leda has a long list of successful Hybrids to its credit. Lc. Helen Wilmer has always made fine Hybrids when it was used wisely. Dark large flowers of great substance have always been the result. Lc. Helen Wilmer has always bred flowers which were very well shaped.	2" pots	3.00
441	<b>C. ENID (C. MOSSIAE X C. GIGAS)</b> No collection would be complete without C. Enid. We make this cross from time to time in order to insure the amateur and market grower a dependable supply.	2" pots 3.00 2½" pots 5.00	
451	<b>C. WHITE EMPRESS (F.C.C.-R.H.S.) X C. BELLE JONES</b> A pure white which will bloom February through April should be the result here. Both parents are excellent growers.	2½" pots	\$6.00
452	<b>C. EDITHAE #1 (LATE VAR.) X C. MOSSIAE "WAGNERII" #2</b> We refer you to description under #488.	2½" pots	\$6.00
453	<b>C. INTERTEXTA "JULIETTE" (VAR. ORCHIDHAVEN) X C. MOSSIAE "WAGNERII" (VAR. ORCHIDHAVEN)</b> Everyone who grows Cattleyas will know of the fine growing qualities of C. Intertexta Juliette. This particular Cattleya Hybrid has always been known to produce very free flowering Hybrids. A union with C. Mossiae "Wagnerii" (Var. Orchidhaven) should produce a very strong Spring flowering white for the months of March and April.	2½" pots	\$6.00
455	<b>C. CLOTHO (C. ENID X C. TRIANAE)</b> Season is the outstanding part of this cross. It is a sure midwinter FLOWER. Growth is always excellent.	2½" pots	\$5.00
456	<b>C. REMY CHOLLET X C. CHEROKEE</b> The season which will be covered by this Hybrid should be November and December as both sides of the cross bloom at this time of the year. Both are very strong growers.	2½" pots	\$5.00
457	<b>C. PETER SANDER (C. REMY CHOLLET "DARK TYPE" X C. MOSSIAE "DARK")</b> The fine results of this cross when it was originally made prompted us to remake this fine Hybrid. Both parents were exceptional in their class.	2½" pots	\$5.00
458	<b>LC. MERMOZ X C. MOSSIAE "R. E. PATTERSON"</b> A scarce time for Cattleya and Laeliocattleya blooms is the months of February and March. Lc. Mermoz generally blooms during January and February. The Mossiae used here is a very fine dark type which we have used over and over again and always with excellent results. Similar crosses have generally bloomed during the months of February, March and into April.	2½" pots \$5.00 3" pots 8.00 3½" pots 12.00	
460	<b>(C. RHOERSIANA X C. MAGGIE RAPHAEL) X LC. ALTESSE</b> Both parts of this cross have always bloomed between November and December. A most desirable time for both the amateur and market grower. Vigor is assured because of the strong growing character of both parents.	2" pots \$3.00 2½" pots \$5.00	
461	<b>C. REMY CHOLLET X C. MOSSIAE</b> Hybrids for the Easter season will be assured by this cross. In other words, here will be a glorified Mossiae.	2½" pots	5.00

Cross No.	Name, Parentage and Description	Size	Each
462	<b>C. TRED A X C. MOSSIAE "R. E. PATTERSON"</b> A bright dark and well shaped flower for Easter blooming period should be the result of this cross. Both parents are very strong growers.	2" pots 2½" pots 3" pots	3.00 \$5.00 8.00
463	<b>BLC. EVA PATTERSON (VAR. ORCHIDHAVEN A. M.) X C. TRED A (FINEST DARK)</b> Blc. Eva Patterson (Var. Orchidhaven A. M.) is one of the outstanding Blc. of today. It is a firm bold and large flower of excellent lavender pink throughout. The lip is very large, does not reflex when the flower is placed in a horizontal position as so many Brassavola crosses do. We have used it a great many times and expect some very fine results. Blooming time is January and February. The Treda used here is exceptionally large and is very dark. It has been used at Orchidhaven a great number of times. A number of its hybrids have bloomed and all have been most satisfactory. Season for this cross should be December through February.	2½" pots	5.00
464	<b>LC. SAGANA X C. MOSSIAE</b> Earlier results of this grand cross prompted our repeating it. Season is definitely Easter. Some very exceptionally fine colors were noted in our earlier batch. It will make good Mossiae replacement material.	2½" pots	5.00
465	<b>LC. SAGANA (VAR. EASTER) X C. MOSSIAE "OLIVER LINES"</b> This is a repeat cross with <b>Identical</b> parents. The excellent results of the earlier cross have prompted our remaking this fine Hybrid. The result has been a very much glorified Mossiae. Season is just a bit ahead of the regular Mossiae season. This provides a fine Hybrid which does not have to be forced for Easter. It also will provide the amateur with an excellent Hybrid for that very scarce Winter period.	2½" pots	5.00
468	<b>C. HARDYANA ALBA X LC. JANE DANE</b> Union of these two very fine parents should result in a fine white with colored lip for September, the month of weddings.	2½" pots	6.00
470	<b>C. LADY VEITCH X C. EMILY SHILL ALBA</b> C. Lady Veitch is an excellent parent for Winter Whites. The one we have used is a proven White. C. Emily Shill was raised at Orchidhaven and all the plants have yielded pure white flowers. Season will be February through April. Both parents are excellent growers.	3" pots 3½" pots	10.00 15.00
471	<b>C. EMILY SHILL ALBA X C. LADY VEITCH</b> We refer you to description under #470.	3½" pots	15.00
103	<b>LC. EUGENIE (LC. SCHROEDERAE X C. DIONYSIUS ALBA)</b> We herewith present an exceptional new White colored lip which has a blooming season of October through December. The flower is exceptionally large and the plant is an extremely strong grower. In its particular class flower production is unequalled.	4" pots 4½" pots 5" pots	\$30.00 35.00 40.00
477	<b>C. RITA SLADDEN X C. BARBARA DANE</b> Season of blooming will be the important part of this fine cross. We expect that it will bloom through the months of November and December. Flower should be of heavy texture.	2" pots	3.00
478	<b>LC. GEORGE BALDWIN (LC. PRINCESS MARGARET "EXTRA FINE VAR." X C. ENID)</b> This repeat Hybrid is amply described in our Cross Numbered 425.	2½" pots	6.00

Cross No.	Name, Parentage and Description	Size	Each
479	<b>C. RITA SLADDEN X C. CLEMENTINE GOLDFARB</b> This is a reverse cross of No. 426. In either case we insist that this will be one of the strongest growing white crosses.	2½" pots 3" pots	6.00 10.00
482	<b>C. ENID X (C. CHELSEA X C DINAH)</b> The fine growing qualities of C. Enid merged with the other Hybrid used here should make a very desirable Hybrid for late Spring. Flowers should be very large and of exceptional substance.	2½" pots	5.00
483	<b>LC. HERTHA X C. BELGICA</b> Winter season is the most desirable for most Cattleyas. The above cross will assure an abundance of flowers for this season. Form of this cross should be very fine. Size of the resultant flowers should be very large. Color will run to the darker shades of lavender.	2½" pots	5.00
484	<b>LC. HILLARY "F.C.C.-R.H.S." X C. ENID</b> An earlier batch of this cross which has flowered is one of the outstanding new Hybrids. We have repeated the cross with the same Lc. Hillary also using a very similar C. Enid. Flowers are very large and dark; growth is outstanding.	2" pots 2½" pots	3.00 5.00
486	<b>LC. CYNTHIA "F.C.C.-R.H.S." X (C. TRIANAE "REINECKIANA" X C. DIONYSIUS ALBA)</b> Both components of this cross are fine growers and Winter bloomers. Fine quality flowers should be the expectation here.	2" pots 2½" pots	4.00 6.00
487	<b>C. LADY ALEXANDER ALBA X C. ROYAL HAROLD ALBA</b> A need for a very free growing white for the Fall wedding season prompted this cross. Both parents are paper white in the petals and sepals with very brilliant lips.	2" pots 2½" pots	3.00 6.00
488	<b>C. EDITHAE #1 X C. MOSSIAE "WAGNERII"</b> An earlier batch of this cross has already bloomed. The excellent results obtained guided us in remaking the cross with the same VERY LATE Edithae and the same Mossiae "Wagnerii". Flowers are large, well shaped with very good texture. Season is Easter and after Easter which makes this cross a valuable one. It has been named Dorothy Mackaill.	2" pots 2½" pots	3.00 6.00
489	<b>C. ROYAL HAROLD ALBA X C. LADY ALEXANDER ALBA</b> We refer you to description under #487.	2" pots 2½" pots	3.00 6.00
490	<b>LC. HILLARY (F.C.C.-R.H.S.) X C. MT. ROYAL</b> In make-up this cross is very similar to #484 except that the use of Mt. Royal on the one side will tend to make the blooming date about one to two months later. The infusion of Dowiana in the Raphaelii which in turn made the Mt. Royal should impart fine color to the resultant Hybrid.	2" pots 2½" pots	4.00 6.00
492	<b>LC. HELEN WILMER X C. MOSSIAE "R. E. PATTERSON"</b> The records made by Lc. Helen Wilmer as a parent are beyond question. The variety used in this case was named variety "Orchidhaven". This was used to make our celebrated Lc. Frank J. Lind. The Mossiae used is very dark and has proven to be a very fine parent in other crosses.	2" pots 2½" pots	3.00 6.00
493	<b>C. GRAVESIANA ALBA X C. MOSSIAE "WAGNERII"</b> Our quest here is for a good growing White for the Easter season. Both parents are strong growers and they are proven white breeders.	2" pots 2½" pots	3.00 6.00

Cross No.	Name, Parentage and Description	Size	Each
494	<b>C. EDITHAE #1 X C. INTERTEXTA ALBA</b> Here we again use our very late Edithae #1. The Intertexta Alba is a proven white breeder which always blooms during the Spring months. Season should be March, April and May because of the variable blooming habit of Intertexta Alba.	2" pots 2½" pots	3.00 6.00
495	<b>C. MOSSIAE "REINECKIANA" (YOUNGS VAR.) X. C. PRISCILLA ALBA</b> We have raised and named several successful batches of this Hybrid. Results have been most satisfactory. Season is March and April, also early May.	2½" pots	6.00
496	<b>(C. GRAVESIANA X C. TRIANAE "BROOMHILLS") X C. MOSSIAE "WAGNERII" (VAR. ORCHIDHAVEN)</b> Here again we make another bid for a fine quality, Spring blooming pure white. All the parents are proven white breeding stock. Season will be March through May.	2" pots	3.00
498	<b>C. SPECIOSISSIMA ALBA "F.C.C." X C. MOSSIAE "WAGNERII"</b> Season of this pure white Hybrid has proven by earlier crosses to be the Winter and Spring months.	2" pots 2½" pots	3.00 6.00
499	<b>C. DOWIANA X C. MOSSIAE "BRILLIANTISSIMA"</b> Each year we repeat some of the earlier successful crosses. In this case we remake C. Empress Frederick with the finest parents we have at our disposal.	2" pots	3.00
505	<b>C. MOSSIAE #24 X C. TRIANAE "G"</b> Here again we repeat with confidence an old dependable cross. This cross is made especially for its Winter blooming and strong growing qualities. Season is from January through March. We have used two very fine species for this first generation cross.	1¾" pots	2.50
506	<b>C. ENID ALBA X C. GIGAS "F.M.B."</b> A dependable white with a brilliant lip will be the result here. Both parents are excellent growers.	2" pots 2½" pots	3.00 6.00
508	<b>C. EDITHAE #1 X C. TRENTINO</b> One of the outstanding features of this particular cross will be exceptionally strong sepals. C. Trentino always imparts this habit when used as a parent. We again use our proven and very dependable Edithae #1.	2" pots	3.00
512	<b>BC. CLIFTONII "MAGNIFICA" X C. MOSSIAE "BERGENFIELD"</b> We repeat Bc. Imperialis using only our finest parents. Mossiae "Bergenfield" is a very dark Mossiae.	2" pots	\$3.00
513	<b>C. SPECIOSISSIMA ALBA "F.C.C." X C. MOSSIAE "WAGNERII"</b> We refer you to description under #498.	2" pots	3.00
424	<b>LC. LOUELLA PARSONS (LC. JANE DANE X C. GIGAS "F.M.B.")</b> Everyone knows the very excellent growing qualities and blooms produced by Lc. Jane Dane, and the wonderful Hybrids made by C. Gigas "F.M.B." The blooming season is November through January.	3½" pots 4" pots 4½" pots 5" pots	\$14.00 16.00 20.00 25.00
